

## Interactive Speed Signs

Vehicle activated speed signs are a proven road safety asset. Research shows that vehicle activated speed signs reduce speed resulting in improved road safety.

The GR range of signs are extremely versatile, well engineered and simple to mount. The unique mounting bracket allows easy battery changing and provides robust security.

The GR range of signs are available with a data collection option that enables the user to monitor the performance of the site

The GR range of signs have embedded Bluetooth for ease of set-up and data retrieval.

### Technical Data

#### Radar Sensor

Licence exempt MPT1349  
Transmitting power#: 5Mw  
Measurable speed: 3.255Km/hr  
Accuracy: +/- 3%  
Measurable range: car approx. 80m  
lorry approx. 120m

#### Display

Reading angle: approx 180 degrees  
Refresh cycle: 0.5s  
Temperature range: -20 to + 60C

#### GRS Software

Data analysis with statistical  
& graphical outputs

#### Enclosure

Material: Glass reinforced polyester  
Protection: Ip66  
Front panel: Macrolon
